

Skype 1.2.0.21 Beta

Posted by: ManXP

Posted on : 2005/3/11 15:07:38

Skype is the next phenomenon from the people who brought you KaZaA. Just like KaZaA, this uses P2P (peer-to-peer) technology to connect you to other users – not to share files this time, but to talk for free with your friends. The technology is extremely advanced - but super simple to use. You’ll be making perfect quality free phone calls to your friends in no time.

■ Software License: Freeware
