Comparator Fast is an application that simplifies the comparison / verification / synchronization status of two different directories on any media (local drives, network drives, writable CD's, Compact Flash and electronic media, any drive/disk or device managed as valid windows pathnames). You just have to specify both paths, choose some parameters options and click SCAN button. Comparator Fast will scan both directories (and subdirectories if specified) and show information on easy to read and understand tabbed windows. Easy setting's setup with the Preset Wizard, guides you step by step, with complete help. Change Files attributes and date/times (Modified, Created, Last Accessed) with the Touch Files tool. Keep your Computer's clock on time (exact time) with Internet Time tool (synchronizes with "Atomic Clock" Time Servers around the world.
