Quick3270 is a powerful, high reliable 3270 / 5250 terminal emulator for Windows that connects PCs to IBM's zSeries (S/390) and iSeries (AS/400). Good integration with the Windows user interface and the easy to use of the software will save you money for training costs and help desk call. Quick3270 is an OLE Automation Server. This feature allows you to automate, in an easy and standard way, the data exchange between your mainframe and your Windows application.
