Easy Office enables tabbed browsing for MS Office. You can open a new document in a new tab in the current window. If you want to open new document in a new window, just click the “tabs” button to disable the tabbed browsing function. Easy Office also provides a new task pane named “Library” for Microsoft Office. It always stay on the left side. It creates a tree-like hierarchical list of all office files and subfolders contained within a specified directory. You can double click the file node to open the file in related Office Application(Word, Excel or PowerPoint).
