FindGraph is a comprehensive, feature-rich graphing, digitizing and curve fitting software specially created for these purposes. Take any graph or data from any source (Web or PDF document, for example), add your comments, and perform any manipulations, like nonlinear regression or curve fitting. Then print your results or export them to Excel or other database.

■ Software License: Shareware

■ Operating Systems Support: Microsoft Windows

■ Download Link: [FindGraph 2.46](#)

■ Homepage: [FindGraph](#)

■ Version ChangeLog:

Apply RBF and RNN networks to predict time series.
Reduce the number of points with EMD algorithm.
