

SecretDrive 1.3.5

Posted by: ManXP

Posted on : 2008/6/7 1:17:25

SecretDrive is a small, efficient and reliable program that allows you to create up to 16 encrypted virtual disks. Virtual disk is protected by one of five modern encryption algorithms: AES (Rijndael), GOST 28174-89, Blowfish, Twofish, CAST 256. Supports optional creation of up to 4 hidden disks in an existing one, backup and restore secret disk header, encryption/decryption of files.
