Encrypt Web Pro is a software tool to protect your web pages. It encrypts your email addresses, script code, links, text, graphics or all HTML source code to make them unreadable but work normally in web browsers. Thus others can't extract your email addresses, steal your script code and steal unique web design etc. Additionally, Encrypt Web Pro also have many other protect features for you to use, such as "Disable right mouse click", "Disable text select", "Disable page printing", "Disable off-line use", "Disable links display in status bar", "Disable printscreen", "Kill frame", "Disable drag and drop", "Location lock", "Referrer lock" etc. To encrypt files with this tool, what you need to do is just clicking a few buttons.
